How to **Activate** your **Corporate eSIM Plan**

*We used a Samsung Galaxy to show you the installation and activation process for an Android device; this might be different depending on your Android device
Here's a quick guide **to set up your eSIM on your device*.** Before getting started, keep these three bits in mind:

🚀 Once you've received your eSIM, install it before your trip

📍 Make sure you have a stable internet connection for the installation

🌐 Once at destination, turn on data roaming for your eSIM plan

---

iOS **Direct Installation**

1 1 1

> After receiving your eSIM plan to your email > Click the "Install eSIM" button.

> Set up your plan following the instructions.

Install eSIM

2 2 2

> When you arrive at your destination, make sure you have set the eSIM as your Mobile Data line.

Do this by going to your phone Settings > Mobile Service > Mobile Data > Choose your new Corporate eSIM.

Back   Mobile Data

ZIM eSIM   ✓

Allow Mobile Data Switching

Turning this feature on will allow your phone to use mobile data from both lines depending on coverage and availability.

3 ③ ③

> Remember to turn On Data Roaming for the Corporate eSIM and turn Off Data Roaming for your primary SIM.

Do this by going to your phone Settings > Mobile Service > Corporate eSIM > turn On Data Roaming.

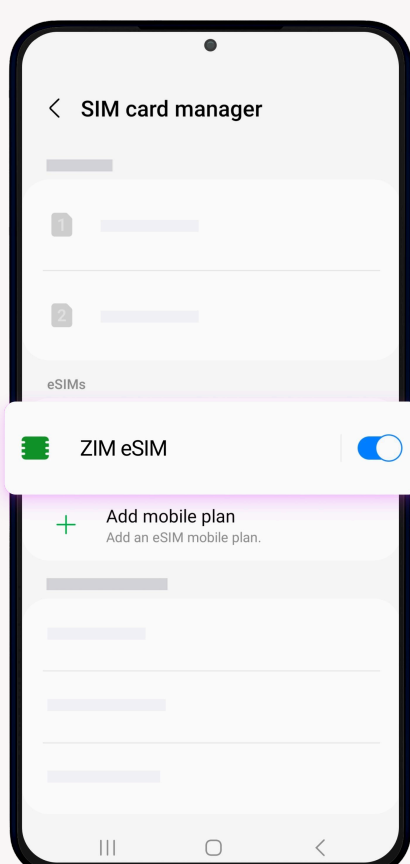

Direct Installation

1 ① ①
> After receiving your eSIM plan to your email > Click the "Install eSIM" button.

You might be prompted to select an app to install your new Corporate eSIM plan (optional) > Choose "Phone Services"

Complete the final steps. It will take a moment for your new eSIM to connect.

2 ② ②

> When you arrive at your destination, make sure you have set the Corporate eSIM as your Mobile data line.

Do this by going to your phone Settings > Connections > SIM card manager. Choose the Corporate eSIM as your Mobile data line by turning the toggle On.
3 3 3

> Remember to turn On Data roaming for the Corporate eSIM and turn Off Data roaming for your primary SIM.

Do this by going to your phone Settings > Connections > SIM card manager. Make sure Data roaming is enable for the Corporate eSIM by turning the toggle On.
